## Mental Health Facts

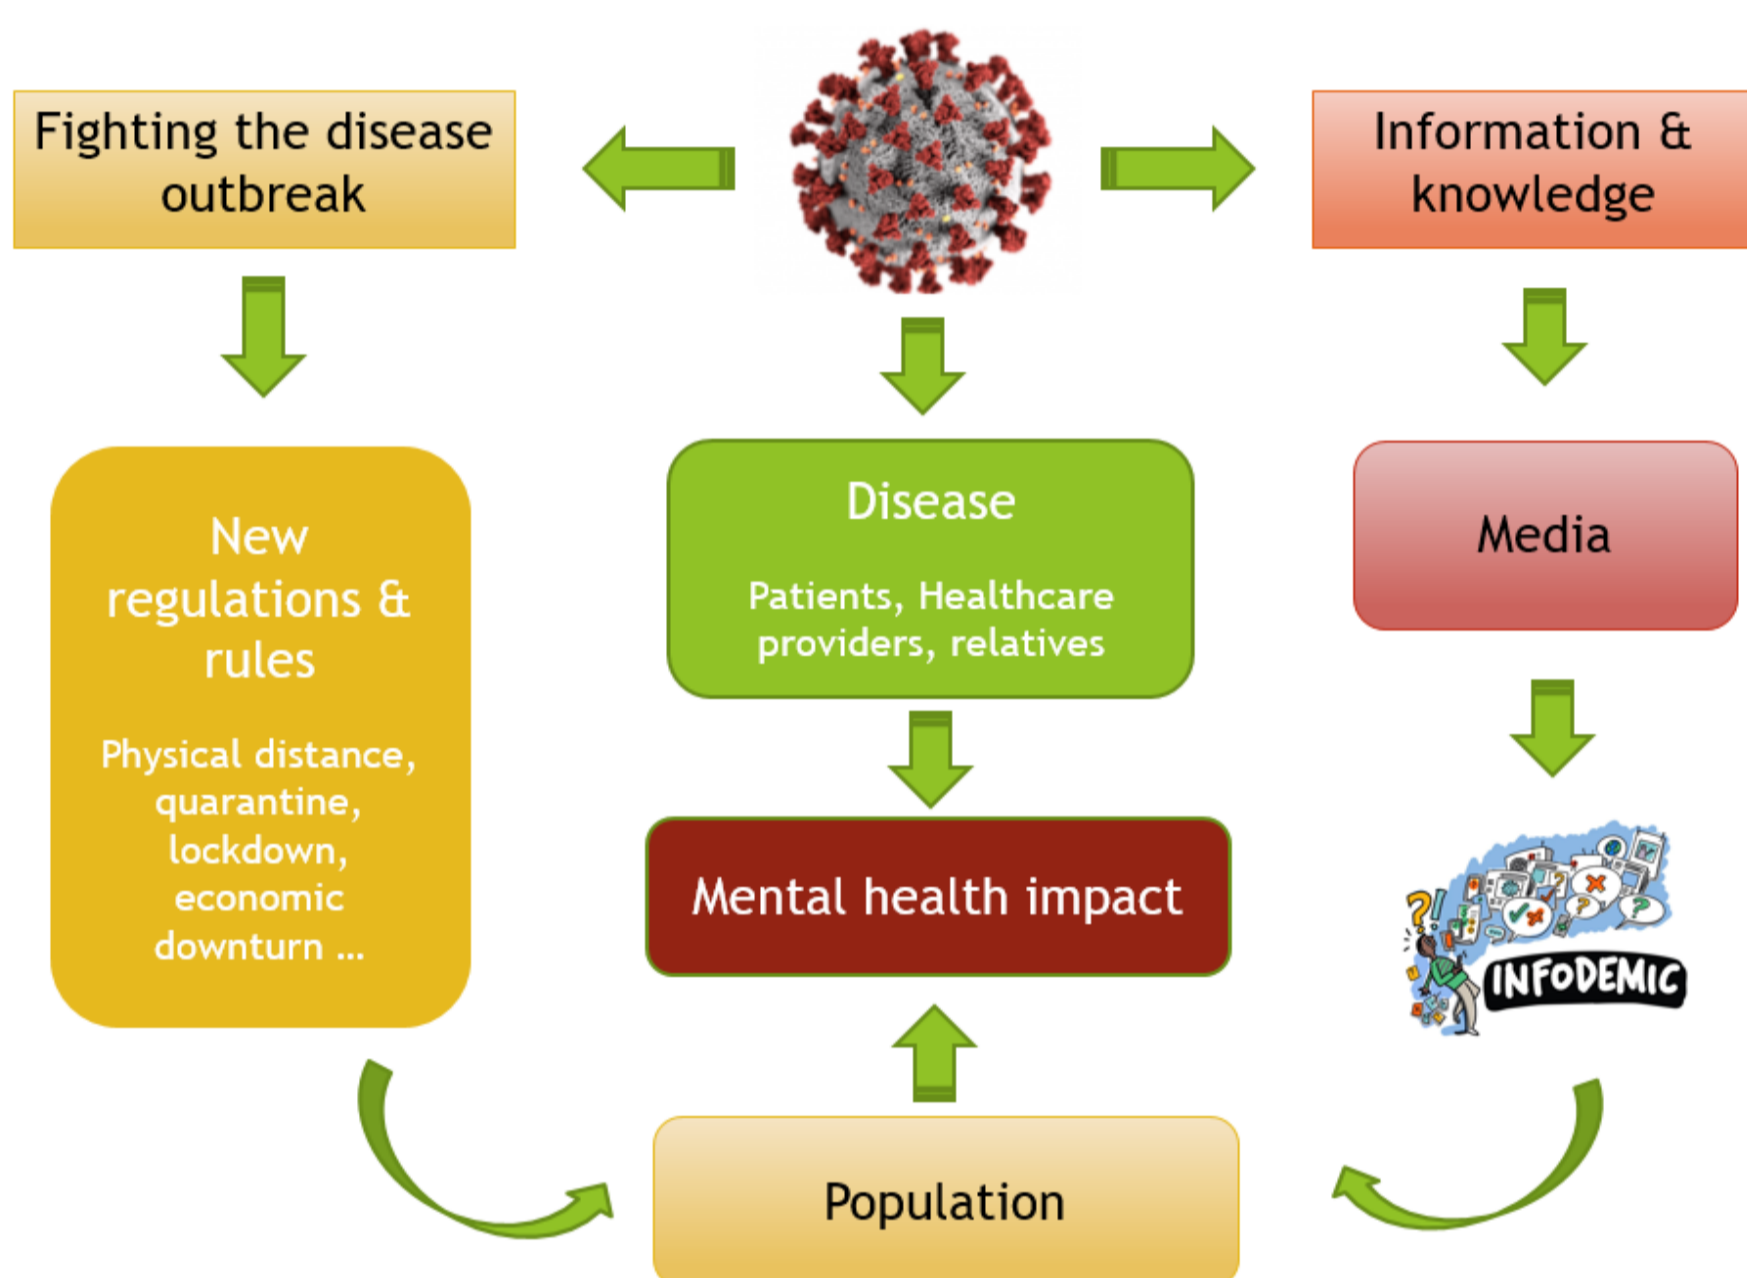

- Mental, neurological and substance use disorders make up 10% of the global burden of disease and 30% of non-fatal disease burden;
- ~1 in 5 children and adolescents have a mental disorder. Half of the mental disorders beginning before the age of 14;
- Depression is one of the leading causes of disability, affecting 264 million people. The global economy loses ~ 1 trillion US\$ per year in productivity due to depression and anxiety;
- Suicide is an extreme but not uncommon outcome for people with untreated mental disorders. 800 000 die due to suicide every year (approximately 1 person every 40 sec);
- People with severe mental disorders die 10 to 20 years earlier than the general population.
- Financing: <2% of the global median of the health budget.
- Human resources: 9 mental health workers per 100 000. Rates vary from 2 per 100 000 population in low income countries to >70 per 100 000 population in high income countries.

## ICT for Mental health in COVID Pandemic

The utilization of information and communication technologies (ICT) for remote mental health support is inevitable part of eHealth. Tele-mental health counselling and therapy offer help to those who need it, no matter where they are and at what time of the day or night this happens. It has proven its potential supporting participants of Arctic expeditions and space missions - both at the Mir Space Station and in the International Space Station (ISS) as well as during ground-based psychosocial isolation experiments as MARS-500 and Moon experiments.

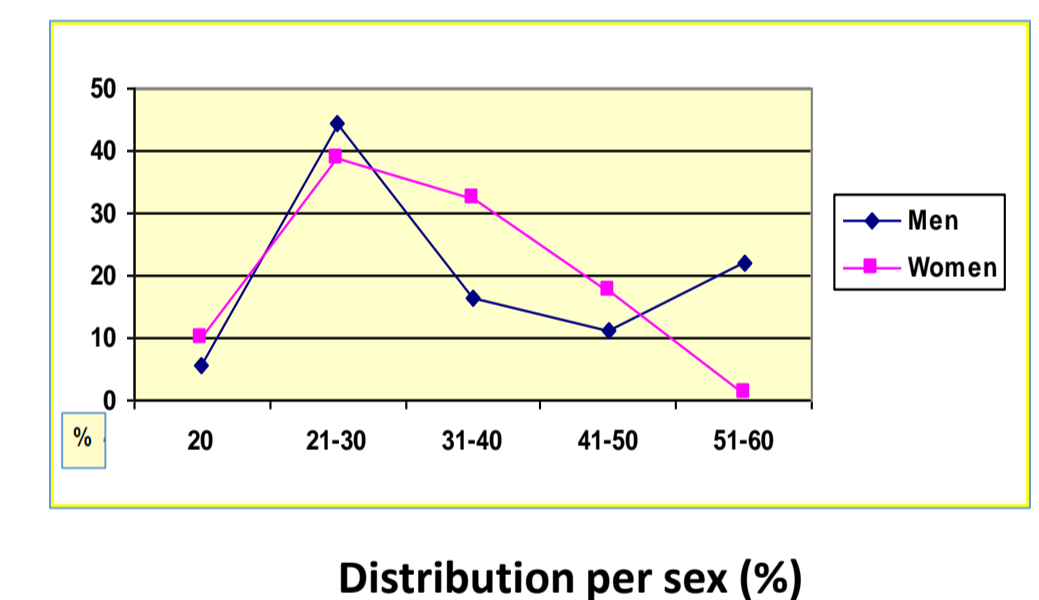

## COVID-19 Impact on Mental Health

## Anonymous online survey, 375 subjects, age 20 – 60+

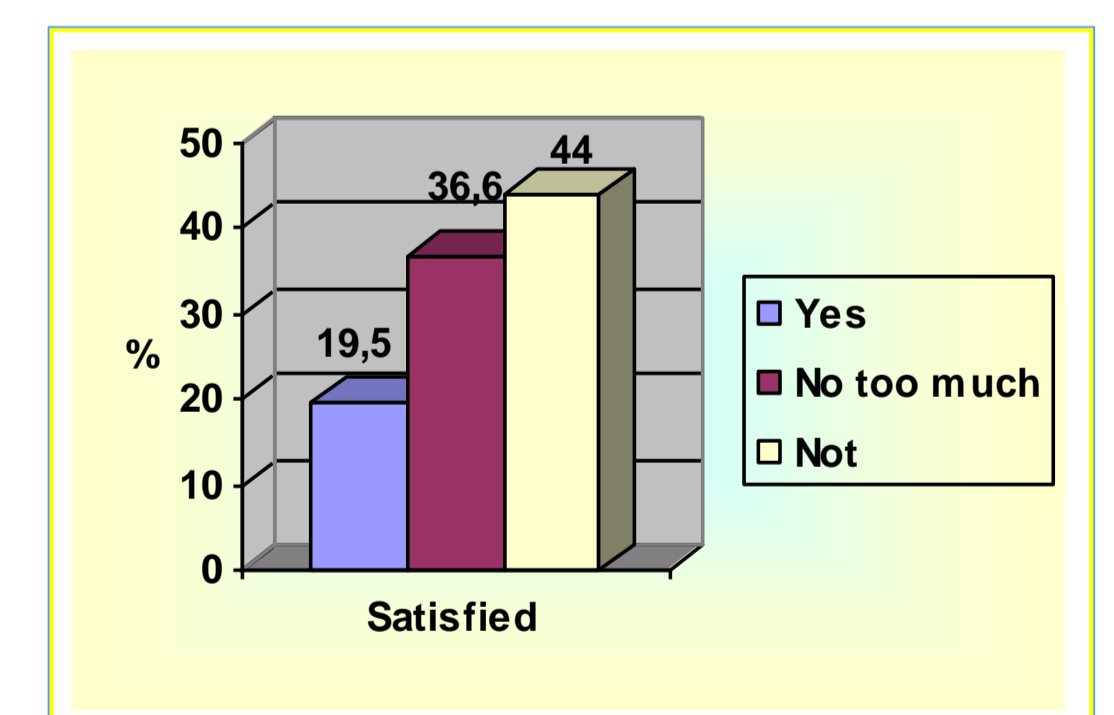

## Acceptance of virtual mental health support

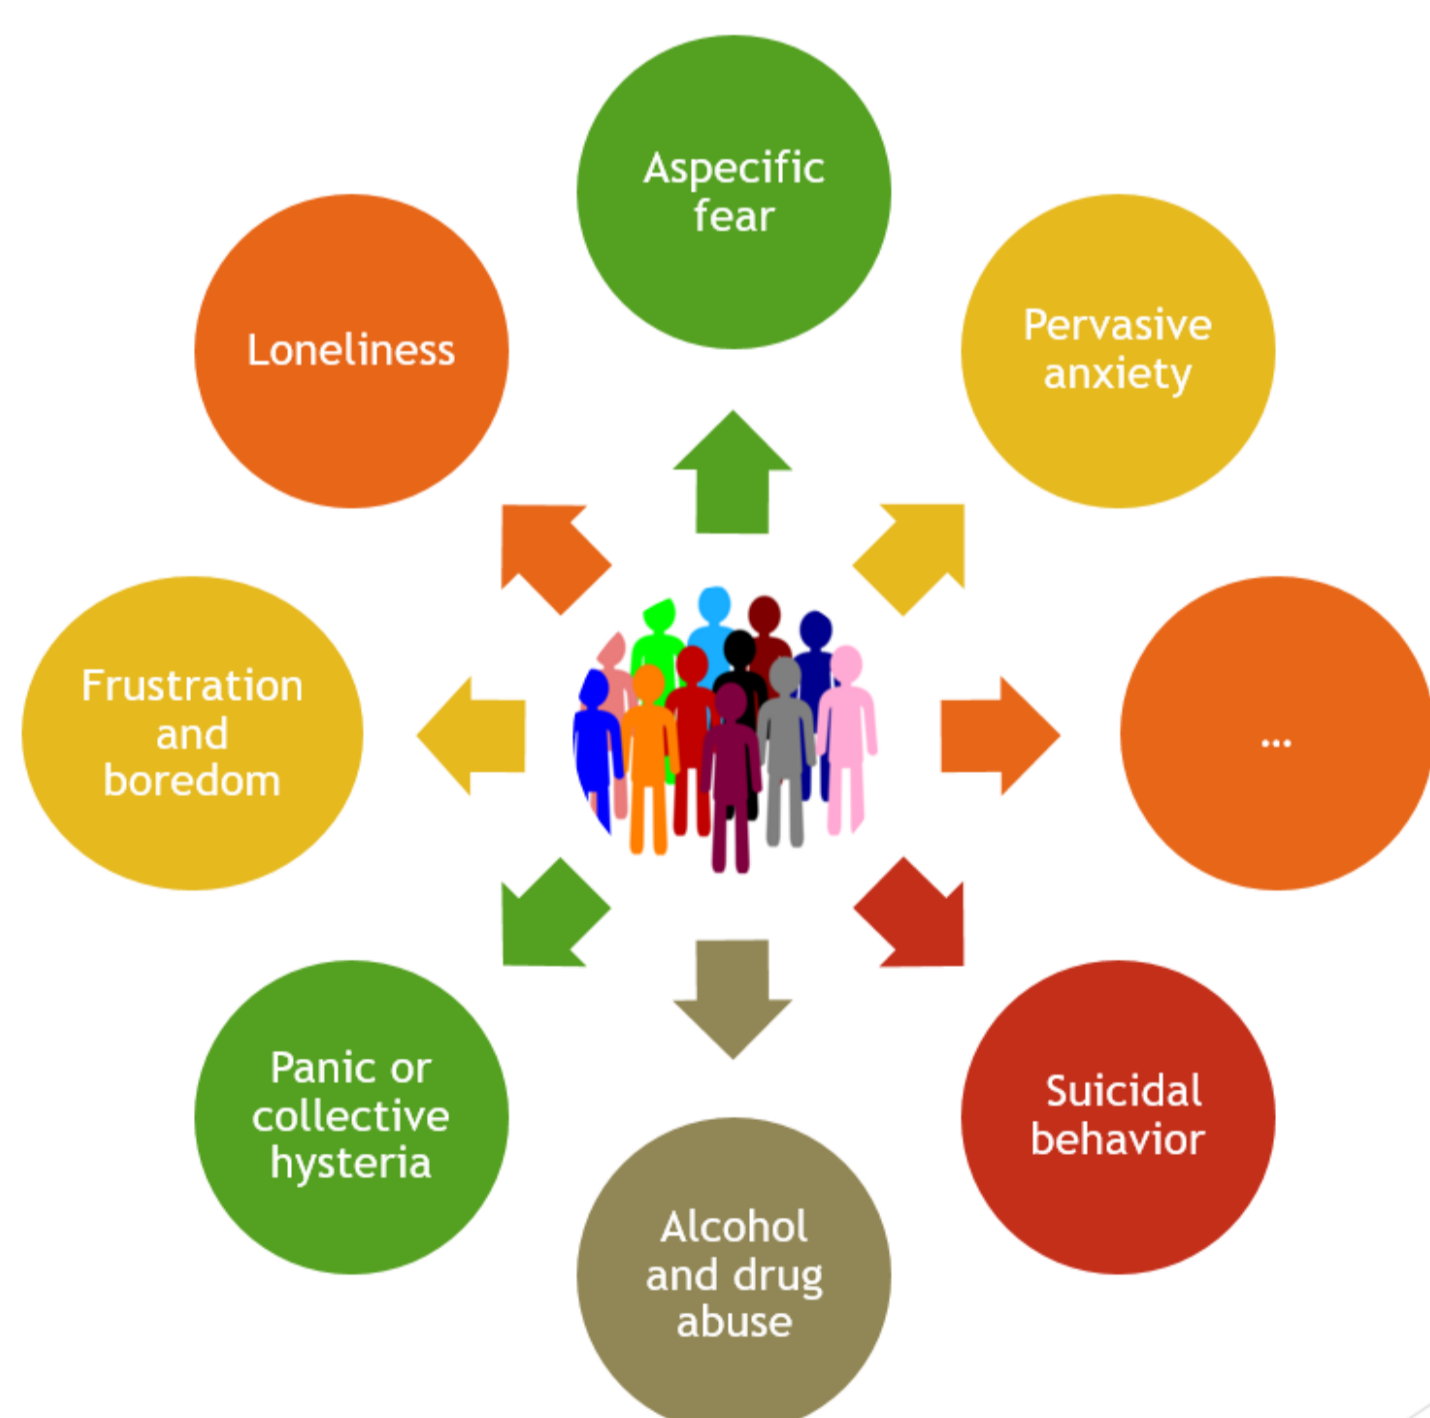

Readiness to use Internet for mental health support (%)

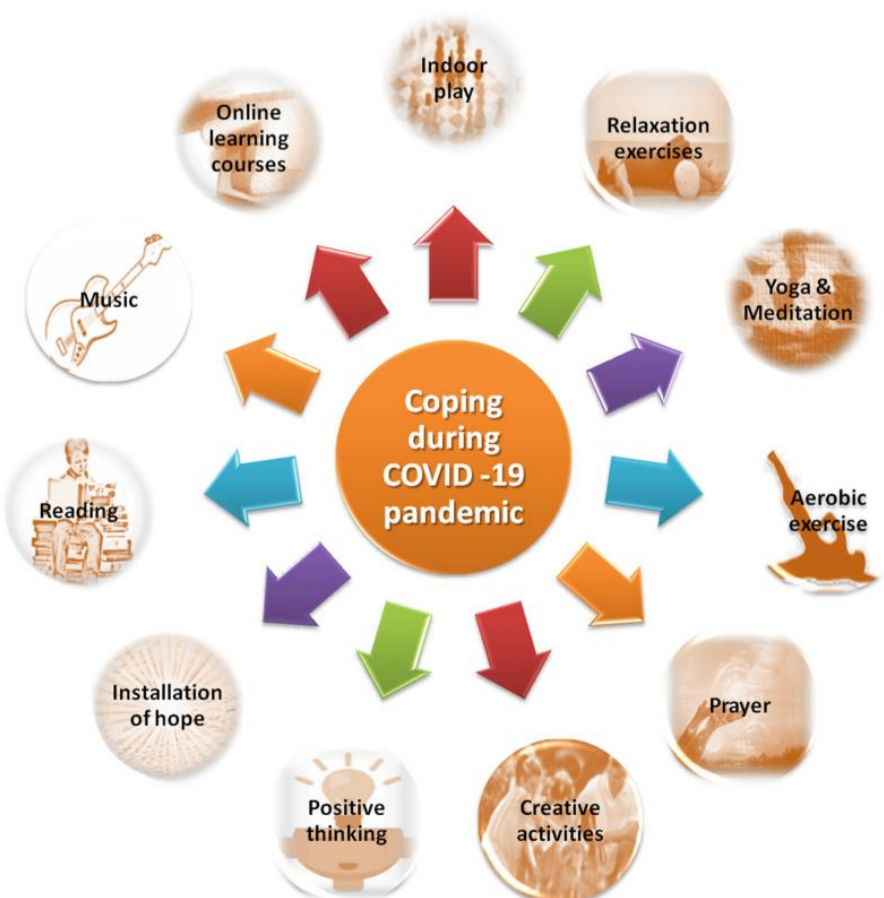

Preferred communication channel (%)

## Most significant psychological reactions in the general population related to COVID-19

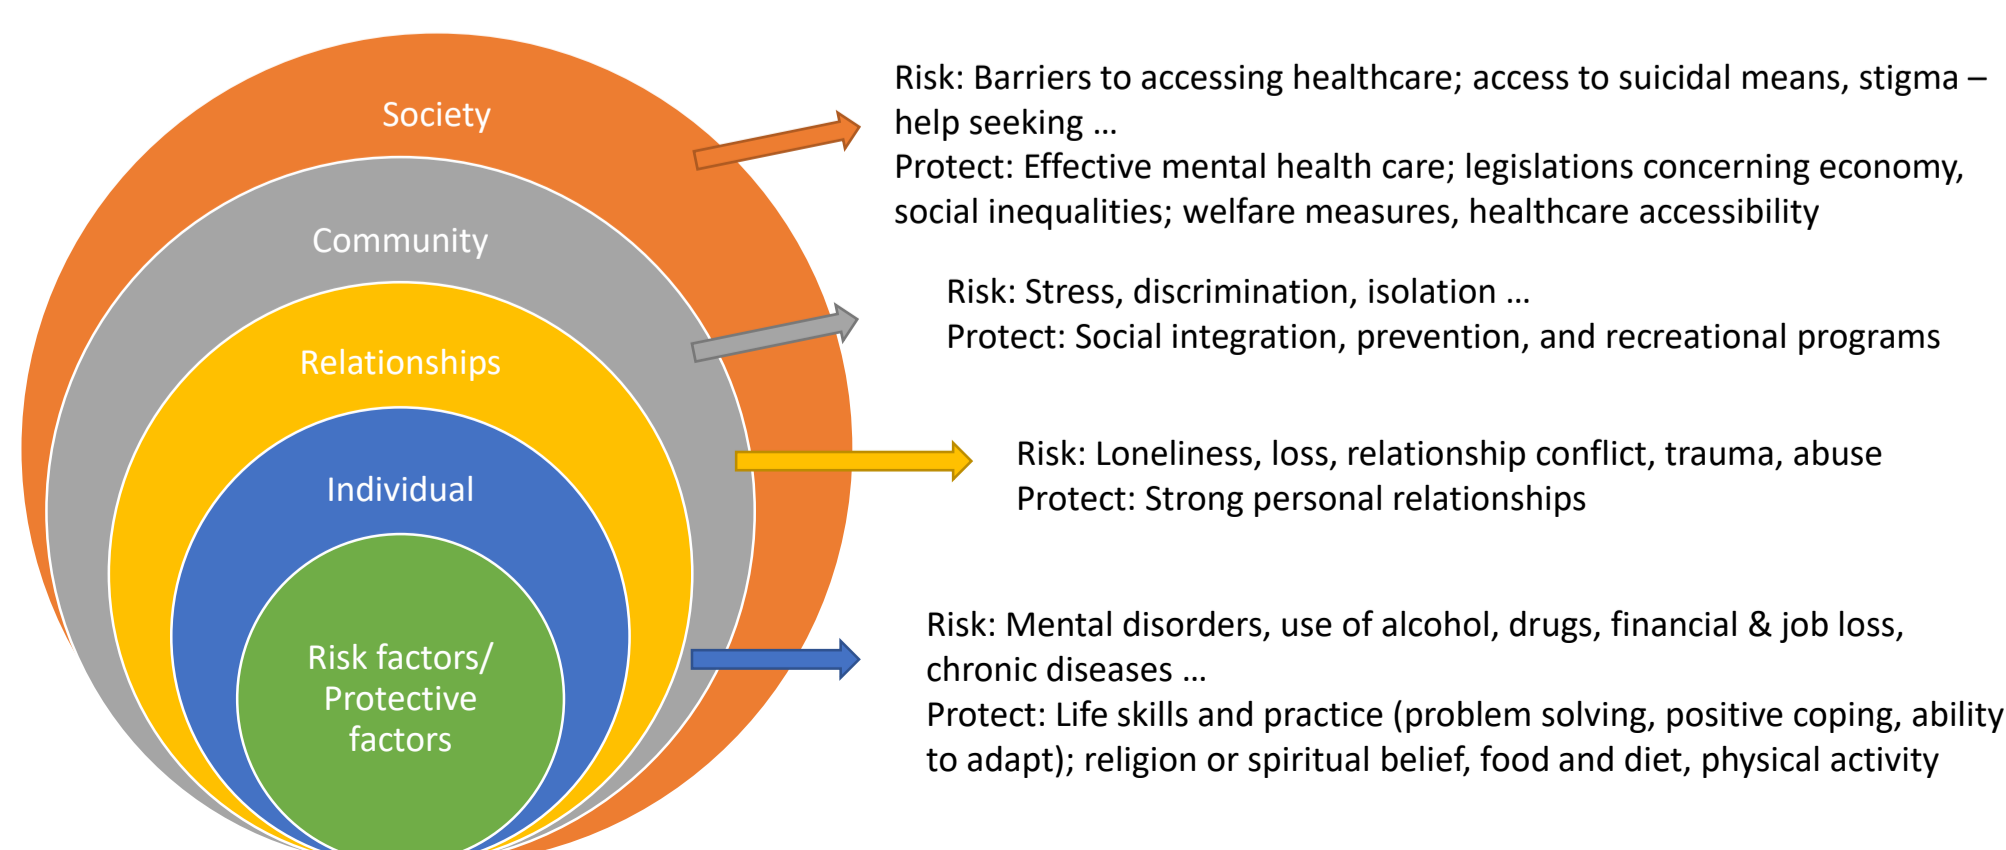

## Coping strategies

## Suicide Prevention

Annual global age-standardized suicide rate - 10.5 per 100 000

## What is next

### Online intervention methods

- Self-management**
  - Popular science reading
  - Online health education courses
  - Online mental health self-education & skills training (incl. coping strategies) ...
- Consultations**
  - Telephone & hotlines
  - Psychological consultation
  - Physician
  - Psychiatrist
